Unusual Value-In Tires for Small Cars

Not only is characteristic Goodyear merit conspicuous in Goodyear Tires for small cars but ordinarily the first cost is found to be not greater than that of other tires; often it is actually less.

The combination of unusual value in first cost and very low final cost, of course, is a result of Goodyear experience, expertness and care employed as insistently in the making of 30x3-, 30x31/2 and 31x4-inch tires as it is in the construction of the famous Goodyear Cord Tires used on the highestpriced automobiles.

For this reason more cars using these small sizes were factory-equipped last year with Goodyear Tires than with any other kind. Get this unusual tire value to enjoy on your Ford, Chevrolet, Dort, Maxwell, or other small car, at the nearest Goodyear Service Station. Get these tires and Goodyear Heavy Tourist Tubes at this station.

Many illustrious men, widely traveled, have returned to write books of their excursions. That doesn't signify that you have only to travel to become a famous author. It does mean that a famous author. It does mean that instructive traveling will give you an appreciation of gifted men, if you have not their power of expression. Inci-dentally, it will write a whole book for you on the value of the things that you have already, and the desirability those which you thought you wanted

How long would any child play with a toy dog without any stuffing? Just that long will normal, fun-loving children play with the exceedingly good little boy, and perhaps not so long, if he is dressed up pretty, wearing curls, spent Sunday with Tisha and Julia like a girl. Don't make your little McKinster of Norls. boy's childhood a horror by trying to incorporate in him all the desirable virtues that you see in other children. A young child can not be controlled by the logic of cause and effect. Their instincts demand expression, although the misplaced energy so called forth often results in much seeming naughtiness. For these same instincts will become strong forces of character later on, and must be developed carefully, not repelled. The child who is repressed into such exceptional goodness almost never falls to come a cropper sooner or later.

Every small boy develops the longing to be a big man very young, and, if he is average, he resents coddling especially. The best way to manage him is to hold before him the responsibilities of the "hero man" as his own. Then give him freedom in which to experiment and afterwards bring out the good points in his mistakes, for there are bound to be such. Did you ever think that the more you emphasize the bad, the more prominent it becomes in the very receptive mind of the child? Above all, if you want to keep the respect and confidence of your young son, don't tell him that he is the worst child you ever saw and on top Every small boy develops the longworst child you ever saw and on top of that urge him to be more like the detested .
